

TRANSPORTABLE RECYCLING CENTER

ABSTRACT OF THE DISCLOSURE

The present invention disclosed herein provides a transportable recycling center (10) that has a container (12) and a partition (18) within the container (12). The partition (18) separates a work area (20) from a storage area (22). An attendant may accept recyclable materials from consumers in the work area (20) and store the recyclable material in the storage area (22). After the container (12) has been filled with recyclable material, doors (14, 16) on the container (12) may be secured and the container (12) may be loaded onto a truck and transported to a recycling facility.
